

Vanguard Medical Device Limited **Carbon Reduction Plan (CRP)**

2026

The bottom half of the cover features several large, overlapping geometric shapes in various shades of teal and light blue, creating a modern, abstract design.

Our Commitment Towards a Low-Carbon Future

Climate change is not a distant risk — it is a defining challenge of our time, affecting health systems, economies, and communities worldwide.

At Vanguard Medical Devices Limited, we recognise that sustainable healthcare requires both circular solutions and decisive climate action. As a medical device distribution company, we play a key role in enabling access to remanufactured products that deliver measurable emissions savings across the healthcare value chain. Building on this contribution, we are committed to further strengthening our environmental impact through continuous innovation, close collaboration with logistics and supply chain partners, and the implementation of transparent, data-driven carbon reduction initiatives.

As a distributor of certified remanufactured medical devices, we are committed to reaching Net Zero greenhouse gas emissions by 2050 in line with the Science Based Targets initiative (SBTi). This reflects our responsibility to reduce emissions within our distribution activities

Vanguard Medical Devices Limited CRP Template

Our Net-Zero Commitment and SBTi Alignment

Vanguard Medical Devices Limited is on a clear decarbonization pathway.

Near-Term Target (SBTi-Aligned):

Reduce Scope 3 greenhouse gas emissions by approximately 50% by 2035 from a 2025 baseline. As a distribution-only organisation, we do not have any activities in Scope 1 or Scope 2 emissions.

Long-Term Target (Net Zero by 2050):

Achieve 90% absolute emissions reduction across all scopes and neutralize remaining residual emissions through verified carbon removals¹.

For us, sustainability means protecting our environment while ensuring the health and well-being of all people.

Embedding ESG and Regulatory Integration

The CRP is fully embedded within Vanguard's ESG objectives ensuring consistency with emerging regulatory and disclosure standards, including:

- GHG Protocol (Corporate Standard): Complete Scope 1–3 inventory under development.
- Alignment with the Science Based Targets initiative (SBTi)
- ISO Standards Integration.

Approval & Contact

This document has been approved by the Vanguard AG Board of Directors and will be reviewed annually. For inquiries or concerns regarding our modern slavery practices, please contact us via the form: <https://vanguard-healthcare.com/>
